

Energy Northwest develops, owns and operates a diverse mix of electricity generating resources, including hydro, solar, and wind projects – and the Northwest’s only nuclear power plant. These projects provide enough reliable, affordable and environmentally responsible energy to power more than a million Washington homes each year, and that carbon-free electricity is provided at the cost of generation. As a Washington state joint operating agency, Energy Northwest comprises 28 public power member utilities from across the state serving more than 1.5 million ratepayers. The agency continually explores new generation projects to meet its members’ needs. | *continued...*

WHITE BLUFFS SOLAR STATION

TYPE
Solar (Polycrystalline photovoltaic)

GENERATING CAPACITY
38.7 kilowatts DC

LOCATION
10 miles north of Richland, Wash.

SITE SIZE
6,000 square feet

PACKWOOD LAKE HYDROELECTRIC PROJECT

TYPE
Hydroelectric

GENERATING CAPACITY
27.5 megawatts

LOCATION
5 miles east of Packwood, Wash.

NINE CANYON WIND PROJECT

TYPE
Wind

GENERATING CAPACITY
95.9 megawatts

LOCATION
Southeast of Kennewick, Wash.

SITE SIZE
75 acres

COLUMBIA GENERATING STATION

TYPE
Nuclear (boiling water reactor)

GENERATING CAPACITY
1,150 megawatts net

LOCATION
10 miles north of Richland, Wash.

SITE SIZE
1,089 acres

ENERGY NORTHWEST FACTS

Headquarters

Richland, Wash.

Employment Figures

Approximately 1,100 full-time employees

Projects and Services

- Four power generation projects
- Environmental and analytical services
- Operations and maintenance services
- Equipment calibration services
- Power system solutions
- Project development
- Facilities leasing

WORLD-CLASS WORK FORCE

Energy Northwest employs a world-class workforce of highly skilled and qualified professionals committed to getting the job done safely and effectively. Expertise includes engineering, operations and maintenance, project management, environmental consulting, technical services and generation resource development. Teamwork and innovation are key components of agency performance and are evident throughout the organization.

VISION FOR THE FUTURE

Energy Northwest is a leader in energy generation technologies. Building from an established record in hydro and nuclear generation, the agency is constantly evaluating new options for serving the power needs of Northwest ratepayers.

PROJECT DEVELOPMENT

Energy Northwest continually explores new generating options for our members primarily focused on renewable energy resources, such as wind, solar and biomass to provide a diverse mix of power options that also help them meet our state's Renewable Portfolio Standards of 15 percent electricity by renewable sources by 2020. We are also working on options for additional baseload power resources such as natural gas and potentially small modular nuclear power which we believe are critical to meet future demand.

- 1 Packwood Lake Hydroelectric Project
- 2 Columbia Generating Station
- 3 Nine Canyon Wind Project
- 4 White Bluffs Solar Station

ENERGY NORTHWEST MEMBERS

Chartered in 1957 as a state joint operating agency, Energy Northwest has 28 public power members including:

- | | |
|----------------------------|----------------------------|
| 1 Asotin County PUD | 15 Kittitas County PUD |
| 2 Benton County PUD | 16 Klickitat County PUD |
| 3 Chelan County PUD | 17 Lewis County PUD |
